

Having described the invention, we claim:

1. A pack of toilet seat covers adapted to be received in a dispenser, said pack comprising:
 - a group of toilet seat covers, and
 - a package for containing said group of covers;
 - said package comprising an insert;
 - said package further comprising a wrapper for enclosing said insert and said group of covers when said package is assembled;
 - said wrapper being made from a lightweight, flexible material;
 - said wrapper having a window portion that is removable to enable access to said group of covers within said wrapper when said package is received in a dispenser.
2. A pack as set forth in claim 1 wherein said insert is made from cardboard or card stock or similar material.
3. A pack as set forth in claim 1 wherein said wrapper is made from plastic.
4. A pack as set forth in claim 3 wherein said wrapper is made from low density polypropylene having a thickness of about one millimeter or less.
5. A pack as set forth in claim 1 wherein said insert is made from cardboard or card stock or similar material and said wrapper is made from plastic.

6. A pack as set forth in claim 1 wherein said insert is made from a relatively stiff material as compared to said wrapper.

7. A pack as set forth in claim 6 wherein said insert is made from cardboard or card stock or similar material and said wrapper is made from plastic.

8. A pack as set forth in claim 1 wherein said insert overlies a back side of said group of covers, and said wrapper has a front panel that overlies a front side of said group of covers and a back panel that overlies said insert.

9. A pack as set forth in claim 8 wherein said wrapper is sealed without stapling or gluing.

10. A pack as set forth in claim 1 wherein said wrapper is sealed without stapling or gluing.

11. A pack as set forth in claim 1 wherein said insert is made from cardboard or card stock or similar material, and said wrapper is made from low density polypropylene having a thickness of about one millimeter or less.

12. A pack as set forth in claim 11 wherein said insert overlies a back side of said group of covers, and said wrapper has a front panel that overlies a front side of said group of covers and a back panel that overlies said insert.

13. A pack as set forth in claim 12 wherein said wrapper is sealed without stapling or gluing.

14. A package for containing a group of toilet seat covers, said package being adapted to be received in a dispenser, said package comprising:

an insert; and

a wrapper for enclosing said insert and said group of covers when said package is assembled;

said wrapper being made from a lightweight, flexible material;

said wrapper having a window portion that is removable to enable access to said group of covers within said wrapper when said package is received in a dispenser.

15. A package as set forth in claim 14 wherein said insert is made from cardboard or card stock or similar material, and said wrapper is made from plastic.

16. A package as set forth in claim 15 wherein said wrapper is made from low density polypropylene having a thickness of about one millimeter or less.

17. A package as set forth in claim 16 wherein said insert overlies a back side of said group of covers, and said wrapper has a front panel that overlies a front side of said group of covers and a back panel that overlies said insert.

18. A package as set forth in claim 17 wherein said wrapper is sealed without stapling or gluing.

19. A package as set forth in claim 14 wherein said wrapper is sealed without stapling or gluing.
